

Recommended Texts / Useful Resources for Psychiatry Trainees:

Context:

The following recommendations are aimed to assist trainees to prepare for the RANZCP Fellowship Program examinations, particularly the Written Examinations.

The trainees are required to have in-depth and comprehensive knowledge of the curriculum, with a reminder that in addition to core clinical psychiatry, they need to cover many areas including phenomenology, epidemiology, relevant neurology and brain diseases, addictions, history of psychiatry, research in psychiatry and evidence base, drug prescribing, ethics, medico-legal concepts and professionalism. The level to target in preparation is that of a competent junior consultant. A junior consultant needs in-depth Specialist knowledge to be able to act independently and safely, working with a broad overview of the related and significant issues.

The following texts are not listed in order of priority, but rather in groups covering general and focused areas of knowledge. The list has been prepared in consultation with a number of Directors of Training and psychiatrists involved in current registrar training and exams. Trainees need to have studied in detail a number of the texts over the various areas/ fields of knowledge to be prepared for the junior consultant standard of the written exams. Supervisors, senior trainees and mentors may recommend their preferred texts. It is suggested that trainees source the most recent editions – some current ones are listed here. This list represents basic requirements. It is not intended to limit the scope of reading in any way.

Name of text		Notes
Comprehensive Psychiatry Texts		
1a	Companion to Psychiatric Studies Edited by Eve Johnston, Stephen Lawrie and David Owens; Pub: Churchill Livingstone (well-recommended and more readable than the K&S "Synopsis")	Good introductory texts for 1st years – any of these three is fine
1b	Synopsis of Psychiatry Kaplan & Sadock; Pub: Lippincott Williams & Wilkins	
1c	The American Psychiatric Publishing Textbook of Psychiatry Edited by Robert E Hales et al; Pub: American Psychiatric Publishing, Inc	
2a	New Oxford Textbook of Psychiatry Edited by: Michael G. Gelder, Juan Jose Lopez-Ibor, Nancy C. Andreasen; Pub: Oxford University Press (Paperback)	Much more comprehensive texts for later in training – only need to get one
2b	Comprehensive Textbook of Psychiatry (2 vols) Kaplan & Sadock; Pub: Lippincott Williams & Wilkins
